WORKFORCE
DEVELOPMENT

STATE OF INDIANA

ANNUAL TRAINING REPORT

2005-2006

SUBMITTED BY:
INDIANA DEPARTMENT OF WORKFORCE DEVELOPMENT
MARKET DEVELOPMENT UNIT

DECEMBER 1, 2006

ACKNOWLEDGEMENTS

December 1, 2006

Members of the General Assembly:

We are pleased to submit to you the Department of Workforce Development's Annual Training Report which covers the period from July 1, 2005 through June 30, 2006.

The year has included numerous job announcements and other indicators that Indiana is making an economic comeback. This news is very exciting for an agency whose main priorities include growing Hoosier jobs and personal income. Our department is proud to have played an important role in attracting new jobs to our state, and we look forward to continuing to do so in the future.

As you read this report, we encourage you to consider the role that providing a skilled workforce plays both in attracting new employers to our state and in ensuring that existing Hoosier employers have a workforce that enables continued success and growth. As new jobs are created and filled, the challenge increases for employers to locate and retain a workforce that can meet the needs of business in the 21st century economy.

The last thing that our department will accept is having companies locate elsewhere because of a lack of skilled workers in our state. In order to retain the momentum that has been created over the past two years, it is imperative that providing high quality training be a central focus of decision makers in our state.

The tools that our agency uses to attack skills shortages are, in large part, provided to us by the legislature. In 2005, the legislature created the Training Acceleration Grant program. We feel that this program has already been, and will continue to be, a valuable tool in addressing the skills needs of our state. We welcome your comments and suggestions as to what we are doing well, as well as to how we can use these tools better in the future. We would also be happy to answer any questions you may have about this report or our department as a whole.

The Department of Workforce Development looks forward to meeting and overcoming any challenge that threatens to slow Indiana's comeback. We look forward to working with you to keep the momentum that recent job announcements have created, and to the future successes of the Indiana workforce.

Sincerely,

**Andrew J. Penca
Commissioner**

INTRODUCTION & BACKGROUND

The mission of the Indiana Department of Workforce Development (IDWD) is to ensure Indiana employers have a competitive and flexible workforce. Furthermore, IDWD is committed to providing all Hoosiers with opportunities and support to grow knowledge and skills for sustained employment in the global economy.

This mission is accomplished through the IDWD core values of:

- **Integrity**
IDWD will serve customers and partners with candor and respect, taking pride and ownership in our work.
- **Accountability**
IDWD is obligated to its customers to continuously evaluate and improve the performance of the workforce development system.
- **Innovation**
IDWD promotes the spirit of creativity and new ideas that challenge the boundaries of current business practices to initiate improvement.
- **Excellence**
IDWD will perpetually raise the bar on performance, striving to establish a premier workforce development system that surpasses the expectations of our customers.

A key component in the execution of IDWD's mission is providing diverse training opportunities aimed at increasing the skill levels of Hoosiers, and delivering programs that meet the demands of Indiana's changing economy. The Indiana Department of Workforce Development is pleased to submit its 2005-2006 Annual Training Report to Governor Mitchell E. Daniels, Jr. and members of the Indiana General Assembly.

The 2005-2006 Annual Training Report summarizes the numerous state and federally-funded training programs awarded and implemented through IDWD from July 1, 2005 to June 30, 2006 (PY 05)*. These programs provide training to incumbent, dislocated, unemployed, and underemployed Hoosier workers. Specifically, this report summarizes the progress and successes of the following training programs:

1. Building Trades
2. Indiana Plan (IN Plan)
3. Trade Adjustment Assistance (TAA)
4. Training Acceleration Grant (TAG)
5. Workforce Investment Act (WIA)
6. Workforce Literacy

This report also contains one-page analytical summaries of each Economic Growth Region along with individual grant profiles detailing specific information required by the state legislature for each training grant during PY 05.

The following chart compares the grant awards and the number of trainees served for PY 04 and PY 05.

* Program Year 2005

IDWD Program Data: Funds Awarded, People Served (PY 04 & PY 05)

Program	Funds Awarded PY 04	Funds Awarded PY 05	People Served PY 04	People Served PY 05
Building Trades*	\$5,968,774	\$3,768,837	8,147	5,271
IN Plan	\$450,000	\$177,500	150	159
TAA**	\$4,727,147	\$7,975,093	1,213	709
TAG	\$15,058,220	\$13,233,064	10,643	11,543
WIA	\$43,721,005	\$48,274,220	12,304	12,580
Total	\$69,925,146	\$73,428,714	32,457	30,262

* PY 05 Building Trades grants were funded through PY 05 TAG funds. Total TAG funds awarded including Building Trades are \$17,001,901.

** PY 05 TAA funds were allocated from Oct. 1, 2005 to Sept. 30, 2006.

BUILDING TRADES

In 2005, the construction industry comprised 5.2% of the Indiana workforce, essentially no change from 2004. Although the construction industry has had negligible growth the past few years, it is now considered one of the fastest growing industries in Indiana based on current employment statistics. Projections for the construction industry in Indiana indicate an 11.8 % increase between 2004 and 2014.

The Major Moves transportation plan is projected to create 130,000 jobs across the state, primarily in construction. The new Lucas Oil Stadium, pictured below, is another example of new job creation in the construction industry. The construction of the Lucas Oil Stadium and the new convention center will create 4,900 new construction jobs during the life of the project.

The construction industry offers some of the highest paying jobs, especially for skilled carpenters, electricians, ironworkers, and bricklayers. To ensure the supply of skilled construction workers meet the demand, the Indiana Department of Workforce Development (IDWD) approved \$3,768,837 in Training Acceleration Grant (TAG) funds for construction training during program year 05-06.

The training provides exceptionally comprehensive, craft-related training and general education courses. The programs blend traditional apprenticeships with college-level curriculum. Training is provided by Indiana Associated Builders & Contractors Apprenticeship Trust (ABC), Ivy Tech Community College, and Vincennes University.

Workers who successfully complete the program can achieve

journeyman status in their respective trade and earn an Associate Degree.

The training prepares students for employment in both union and non-union firms. The Bureau of Apprenticeship and Training, a division of the US Department of Labor, certifies the training.

During this reporting period, 5,271 workers enrolled in construction trades training. Completion data was not submitted to IDWD in time for inclusion in this report.

Demographic data along with more specific details are located in Appendix C of this report.

Testimonials

Stacy Bray, a union apprentice, attending Ivy Tech Community College, offered these comments (edited for space):

“Before starting in the Electrical Apprenticeship program I put myself through school to be a hair stylist. I enjoyed the work and the money was ok, but my employer didn’t provide health insurance and we didn’t have any kind of retirement plan.”

“Being a union electrician will enable me to raise my two daughters the way I was raised, with integrity, a good work ethic and an appreciation for a good day’s work for a good day’s pay. Nothing would make me prouder than my daughters following in their mother’s footsteps, and being a Union Electrician.”

David Harp, a carpenter apprentice, who is attending ABC, said:

“This year was the most informative class I have had. Dennis does an excellent job of explaining techniques and making sure we understand the material before we move on. My employer is very proud of me and has given me several raises since I began the apprenticeship program.”

Dan Hawkins, a plumber apprentice, who is attending ABC, told us:

“The class is well taught; always open for discussion and questions pertaining to the profession and everyday experience in the field. The instructor always offered a positive attitude and was professional. I am already using the skills and knowledge learned out in the field.”

Program Year	Projects	Awards	Planned Trainees	Enrolled Trainees	Completions
2004-2005	5	\$5,968,774	15,681	8,147	7,734
2005-2006	4	\$3,768,837	6,151	5,271	Not available
Total	9	\$9,737,611	21,832	13,418	7,734

INDIANA PLAN

Indiana Plan was created in 1970, by the collaboration between representatives of the Marion County Building Trades, African American community leaders, and a coalition of construction employers and associations. Indiana Plan is a pre-apprenticeship program designed specifically to focus on minorities and female populations; both under represented in the building trades.

The Indiana Plan curriculum teaches basic construction skills, applied construction mathematics, mechanical reasoning, and spatial relations. Upon completion of training, workers are placed in jobs where they can continue their training under the tutelage of journey-level workers.

Each year a single grant is awarded under Indiana Plan. The grantee is then charged with fulfilling the pre-apprenticeship training obligations under the contract. For PY 05, the grant structure was altered from a cost reimbursement to a payment point structure. The PY 05 grant designated a set amount of funds for enrollment, counseling, placement, progress reports, and other performance based metrics. As the grantee performed each service, a fixed amount was paid by the grant. The total grant amount awarded was \$450,000, which is the same as PY 04.

The PY 05 grant was written for a 15 month term, which deviated from the typical 12 month term. At the close of PY 05, this grant had three more months before termination. Therefore, the data in the charts below reflect only the twelve months of activity during PY 05. Final data for this year's grant will be reported next year.

TRADE ADJUSTMENT ASSISTANCE (TAA)

The Trade Adjustment Assistance (TAA) program was established under the Trade Act of 1974 and the Trade Reform Act of 2002. It was created to assist workers who have lost their jobs due to foreign competition or the outsourcing of production activities. To qualify, a petition must be formally submitted to the US Department of Labor. This petition can be filed by or on behalf of the affected workers. Once eligibility is established, benefits including skill training, job search resources, as well as relocation and monetary assistance, must be applied for individually.

Training may be in the form of on-the-job, vocational, technical, or classroom training. Training can last as long as 104 weeks. Eligible training costs include tuition, books, supplies, and laboratory/technology fees. Those trainees that require remedial training may receive an additional 26 weeks of training and benefits.

In PY 05-06, TAA initiated the use of WorkKeys skills assessments to identify skill gaps in order to develop better

training and reemployment initiatives for dislocated workers.

TAA beneficiaries are also enrolled in the Workforce Investment Act (WIA) program to ensure post-training and follow-up services are available to them.

WORKFORCE INVESTMENT ACT (WIA)

The Workforce Investment Act (WIA), Title I, Adult and Dislocated Worker Program, is designed to:

- Improve the quality of the workforce;
- Reduce welfare dependency; and
- Enhance the productivity and competitiveness of the nation's economy.

In order to track performance, the State and Workforce Investment Boards (WIB), which administer the funds, are held to performance standards that include:

- Increasing the employment, retention and earnings of participants;
- Increasing the occupational skill attainment by participants;
- Increasing employment; and
- Customer satisfaction.

WIA specifies that most services for adults and dislocated workers are provided through One Stop Career Centers, called WorkOne centers in Indiana. WIA authorizes three levels of service to adults and dislocated workers: Core, Intensive, and Training.

1. **“Core”** services provided include outreach, job search and placement assistance, and labor market information.
2. **“Intensive”** services include comprehensive assessments, the development of individual employment plans, counseling, and career planning.
3. **“Training”** services include occupational skills training, on-the-job training, and entrepreneurial training.

The objective of the Title I WIA Youth Program is a system for youth development activities and programs in order to help low-income youth acquire the skills and support needed to achieve academic and employment success and transition to productive adulthood.

Youth eligible for WIA services must:

- Be 14 to 21 years of age;
- Receive income or be a family member with a total family income less than the poverty line or 70% of the lower living standard income; and
- Meet certain additional criteria such as:
 - a basic literacy skill deficiency,
 - a foster child,
 - an offender,
 - a school dropout,
 - being homeless or a runaway,
 - being pregnant or a parent, or
 - needing additional assistance to complete education or secure and hold employment.

In regard to this report, detailed demographic data for WIA is located in the appendices.

WORKFORCE LITERACY

Workforce Literacy grants were instituted in January 2006, however actual projects were not identified and funded until May 22, 2006. With the \$1,568,490 available, 10 pilot projects were awarded a total of \$1,292,290. Four of the projects were located in the manufacturing sector, with four others in the healthcare industry. The two remaining awards were allocated to projects in hospitality and logistics/distribution.

Upon conclusion of the training and successful completion of assessment exams, all trainees will earn the 21st Century Workplace Skills Certificate for basic skills (math, reading, communication, etc.) and have the opportunity to earn the international IC3 certificate for digital literacy (Internet, email, etc.).

The projects' curricula focus on six primary skills valuable to the Hoosier workforce: math, reading, communication, critical thinking, problem solving, and digital literacy. Each curriculum is further individualized to the employer hosting the educational program, drawing on actual math, terminology, and situations experienced on the job. As a result, the employees and the employer both benefit from job-related training that is applicable to the daily function of the business.

There are three levels to both the IC3 and the 21st Century Workplace Skills certificates. For the 21st Century certificate, each level corresponds to an increase in basic skills competency.

Industry Summary Data

Industry Category	Awarded	Num. of Projects	Econ. Growth Region
Manufacturing	\$488,168	4	2,3,8,9
Health Care	\$344,192	4	5
Hospitality	\$200,000	1	8
Distribution/Logistics	\$200,000	1	1

The three levels for the IC3 correspond to specific competency in computer skills.

The first level in the IC3 certificate assesses Internet and email capabilities.

Level two includes competency assessments in Microsoft Word, Excel and PowerPoint in addition to the email and Internet assessments.

The third level tests basic knowledge about hardware, software and troubleshooting computer problems. Trainees certified at the third level will be IC3 certified and will receive the international IC3 certification.

It is worth noting that the inclusion of digital literacy with a competency based assessment exam is a new concept in workforce literacy, and Indiana is pioneering the way.

Grant Summary Data

Total amount (\$) allocated to program	\$1,568,490
Total Amount (\$) of Awards	\$1,232,360
Number of Projects	10
Number of Trainees Projected	2,177

TRAINING ACCELERATION GRANT (TAG)

In 2005, the Indiana General Assembly enacted legislation that replaced the Incumbent Worker Training (IWT) program with the Training Acceleration Grant (TAG).

Similar to the IWT program, TAG allows businesses to apply for up to \$200,000 to train their incumbent workforce. The training must also result in a portable credential recognized by both the business and industry.

Yet TAG goes a step further than the previous IWT program by strategically focusing on: small business participation (businesses with 100 or fewer employees), high-wage high-demand occupations, and maximizing the economic return on state training dollars.

Small Businesses

Small businesses make up 96.8% of Indiana employers. Consequently for PY 05, the TAG program made two major changes to increase the participation of small business in training grants.

Grant Summary Data		
Program Year	Projects	Awards
2002-2003	58	\$4,374,625
2003-2004	123	\$12,410,773
2004-2005	137	\$15,058,220
2005-2006	154	\$13,233,064

First, TAG instituted a sliding scale for matching funds to allow small businesses to match less than the required 100% match under IWT. This has relieved much of the burden many small businesses felt with IWT, and has directly contributed to an increase in participation.

Second, the IDWD regional business consultants considerably increased their sales solicitation of small businesses, taking a pro-active approach to contacting them. This resulted in not only greater participation on behalf of small business, but also a greater level of customer service.

As a result, between program years 2004 and 2005, small business grants increased from 34 to 46. Moreover, the amount of TAG funds awarded to small business increased from approximately \$1.7 million to \$2.2 million.

TRAINING ACCELERATION GRANT (TAG)

High-Wage High-Demand Occupations

Special consideration was also given to training programs that included occupations that pay more than the average wage in Indiana (\$31,150) as well as occupations that are in high demand by Indiana employers. Such occupations include many located in the manufacturing, healthcare, logistics/distribution, and information technology sectors of Indiana's economy.

Return on Investment

To ensure that limited training funds are making an economic impact on the businesses and employees in the state, the TAG program gave special consideration to those training programs that demonstrated a substantial return on the investment of training dollars. In order to accomplish this each company was requested to include in their application, a statement outlining how the investment of training dollars will positively effect the performance of the business. This statement was then taken into serious consideration during the approval process.

TAG Ethnicity Data

Ethnicity	Num. of Trainees
White	10,939
African American/Black	619
Hispanic	240
Asian	50
American Indian	40
Hawaiian	7
Not reported	146

The TAG program also made great strides in improving the application and review process to make it more convenient and customer friendly for Indiana businesses. Key improvements include:

- Increasing the review of applications from once to twice a month;
- Developing an interactive online application for easier access, faster approval, and accurate data storage; and
- Reducing the approval process from ninety days to forty-five.

Finally, with concern to this report, all demographic data reported for the TAG program is reported by the employer to IDWD at the time of trainee enrollment. Specific regional data can be found in the Economic Growth Region profiles and company specific data in the appendices.

TAG Trainee Participation by Age (PY 05-06)

Training Acceleration Grant Awards by Economic Growth Region

PY 05-06

Total Awards \$17,001,901

Source: Indiana Workforce Development, Market Development

ECONOMIC GROWTH REGION 1

JASPER, LAKE, LA PORTE, NEWTON, PORTER, PULASKI, STARKE

Regional Overview

Economic Growth Region 1 consists of seven counties in the northwestern portion of the state. It is bordered by Illinois to the west and Lake Michigan to the north.

For Program Year 2005, job growth within the region increased by approximately 2,300. Construction, manufacturing, education and health services, and the leisure and hospitality industries primarily contributed to the regions overall net job growth.

Four Training Acceleration Grants (TAG) were awarded to the region for a cumulative total of \$431,984.95. The majority of the funds went to train incumbent workers in the healthcare and automotive manufacturing industries.

The regional objectives for next year include:

- Increasing the amount of TAG dollars awarded to the region
- Diversifying the industries that receive the training funds

TAG and WorkKeys in EGR 1

As part of the Indiana Department of Workforce Development's overall commitment to increase productivity and personal income of all Hoosiers, Chester, Inc. and La Porte Regional Health Systems have been outstanding partners both to IDWD and their local community.

Chester, Inc. located in Valparaiso, was founded in 1951 by Orville Redenbacher and Charles Bowman and has 50 employees, 30 of whom are located within its information technology division.

Chester's was awarded \$23,604 to train 10 workers in Network + Administration, Auto Cad and Certified Ethical Hacker. All 10 workers successfully completed the program. Richard Shields, the Business Development Manager, reported that one salesman who received this training and certification in Network + was able to secure a new client. This acquisition was worth approximately \$45,000 in sales.

LaPorte Regional Health Systems has successfully utilized WorkKeys* assessments to assist in its hiring process and to establish a fair system for promotions. As of June 30, 10 positions were being profiled, one of which has successfully allowed Phil Hall, who worked as a groundskeeper, to successfully obtain a position within the engineering department.

Regional Shortages Tackled via Strategic Skills Initiative (SSI)

Anticipating over 200 shortages in welders, cutters, solderers, and brazers in Region 1, business and community leaders partnered with Ivy Tech Community College to expand its welding program. Ivy Tech Community College will work closely with employers in the area to ensure that the training is applicable to the employer's needs. The partnership with employers will continue as the students complete the program and seek employment opportunities and promotions. This was made possible by the state's Strategic Skills Initiative.

TAG Awards by County

County	Grants 2005	Funds Awarded 2005	Funds Awarded 2004
Lake	3	\$410,545	\$701,762
Newton	0	0	\$65,808
Porter	0	0	\$345,648
Starke	1	\$21,440	\$30,219
Totals	4	\$431,985	\$1,143,437

*Those counties not receiving any grant awards were omitted from this list.

Received \$543,080 for Building Trades.

Regional Facts

Total	15,949	100%	100%	100%

ECONOMIC GROWTH REGION 2

ELKHART, FULTON, KOSCIUSKO, MARSHALL, ST. JOSEPH

Regional Overview

Economic Growth Region 2 consists of the five counties along US 31 in the upper north central area of the state, with two counties sharing their borders with Michigan to the north.

The region has seen significant job growth over the last year with the addition of more than 3,700 jobs. Surprisingly, the manufacturing industry, while declining in some areas, continues to add jobs in EGR 2.

The majority of Training Acceleration Grant (TAG) funds went to St. Joseph County. However, endeavors during the last year to reach other counties in the region have paid off. Marshall County received training funds for the first time during this reporting period. Continued outreach to underserved counties, particularly Fulton, will remain a focus for the coming year.

Ninety-six percent of the employers in the region have 100 or less employees, which underscores the importance of small firms to sustain economic growth in the region. Reaching out to small businesses in the region has been a top priority for IDWD.

Objectives for the next year include:

- Continue outreach to underserved communities, particularly Fulton County
- Intensify efforts to increase small business participation
- Engage the substantial bio-medical industry
- Collaborate with the Center for Excellence in Advanced Manufacturing to support the Strategic Skills Initiative (SSI)

Information Technology Certifications

Signal Learning, a customized training provider in St. Joseph County, was awarded \$145,540 to increase the skills of 38 information technology (IT) workers. Seventeen companies from different industries came together to offer their IT staff high-level Microsoft training. Training was scheduled in two-day sessions once a month for nine months to accommodate employer needs. Participating companies said this training was critical to their operations. Thirty-two workers completed training and earned not only certifications, but an average salary increase of 8.5%. This training project was so successful that another IT consortium project is in the works.

Orthopedic Skills Center

As part of the Strategic Skills Initiative, business leaders identified a shortage of 160 frontline workers, 207 welders, cutters, solderers, and braziers, and 75 CNC operators between 2005 and 2007. To address these shortages of highly skilled production workers, Ivy Tech Community College has opened a facility in Warsaw dedicated to training workers in high-skill, high-wage occupations. SSI funds are being used to support this center in two ways: first, SSI has facilitated the purchase of a portion of the specialized equipment installed at the training site. Second, and more importantly, the Initiative is providing tuition support to students pursuing certifications in skills related to the orthopedic equipment industry. This Orthopedic Skills Center, as well as programs supported by SSI funds elsewhere in the region, will build capacity of skilled workers to sustain growth in the life sciences industry.

TAG Awards by County

County	Grants 2005	Funds Awarded 2005	Funds Awarded 2004
Elkhart	3	\$57,084	\$284,361

ECONOMIC GROWTH REGION 3

ADAMS, ALLEN, DE KALB, GRANT, HUNTINGTON, LAGRANGE, NOBLE, STEUBEN, WABASH, WELLS, WHITLEY

Regional Overview

Economic Growth Region 3 consists of eleven counties located in the far northeastern corner of the state. The region is bordered by Michigan to the north and Ohio to the east.

In 2005, net job growth within the region increased by approximately 3,800 jobs. The largest growth was in trade transportation & utilities, professional and business services, and education and health services.

Training Acceleration Grant (TAG) dollars were distributed throughout the geographical area, with the majority of the funds concentrated in Allen and Grant Counties.

The objectives for next year include:

- Increasing the number of training grants to small business with 100 or less employees
- Increasing the amount of training funds going to the more rural areas of the region

Pellegrino & Associates

Pellegrino & Associates LLC is a technology valuation and appraisal company based in Fort Wayne. Founded in 2003, the company combines extensive technology and finance experience to provide its clients with valuations and appraisals for tax and investment purposes. It serves very small businesses and Fortune 500 companies. The \$7,000 TAG award will allow the company to obtain accreditation through the American Society of Appraisers. The competency requirements of this professional designation will allow Pellegrino & Associates to defend its appraisal work. By earning the credentials, annual sales are expected to increase dramatically within the first year. They are a very small business but plan to grow in Indiana and have a national presence. The company's goal is to hire seven additional employees within the next year.

WorkKeys Assessments Assists BF Goodrich Tire Mfg.

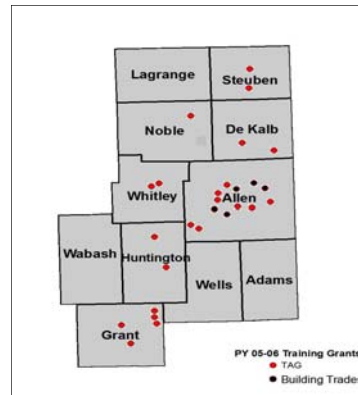

BF Goodrich Tire Manufacturing started utilizing WorkKeys in August 2005 for entry-level hiring. According to its area personnel manager, Reggie Walker, "since the introduction, we have experienced a reduction in training time and our turnover rate". He further states, that "employees come to the job better equipped to meet our expectations." WorkKeys has become a foundation in its hiring process.

Center for Advanced Manufacturing

Through the Strategic Skills Initiative, EGR 3 identified computer-controlled machine operators as a critical shortage occupation. Specifically, the region anticipates a shortage of 409 computer controlled machine operators, machinists, and mechanics between 2005 and 2007. In order to address this shortage the region is developing a Center for Excellence in Advanced Manufacturing. The Center for Excellence in Advanced Manufacturing will provide access to advanced manufacturing curriculum and training. The specialized training will grow and support the medical device industry and other advanced material industries in the region.

ECONOMIC GROWTH REGION 4

BENTON, CASS, CARROLL, CLINTON, FOUNTAIN, HOWARD, MIAMI, MONTGOMERY, TIPPECANOE, TIPTON, WARREN, WHITE

Regional Overview

Economic Growth Region 4 consists of twelve counties located in the upper west central region of the state.

In 2005, EGR 4 experienced a loss of approximately 950 jobs. This loss is mainly attributed to the overall reduction of the workforce in the manufacturing and financial industries.

As indicated by the chart highlighting the distribution of TAG awards by county for PY 05, the majority of the funds were allocated to Howard County. However, Tippecanoe County received the highest number of grants.

With approximately 97 percent of the region's employment in companies having 100 employees or less, it is imperative that the participation of small businesses in TAG training increase and this is a key objective for PY 06.

Additional objectives include:

- A targeted focus on companies located in the non-metro areas
- To collaborate with the initiatives set forth in the federal WIRED grant

WIRED & SSI Grant Combined

In EGR 4 the Strategic Skills Initiative grant will build on the federal WIRED grant through the U.S. Department of Labor. The WIRED grant will be used by regional workforce, economic development, and education officials to encourage entrepreneurship, support older workers and target transitional market sectors such as advanced manufacturing. To support the WIRED grant, the SSI grant will be used to develop an advanced manufacturing course called Skill Map. Skill Map will train workers and place them in targeted manufacturing companies that are experiencing shortages.

1,000 Jobs Announced

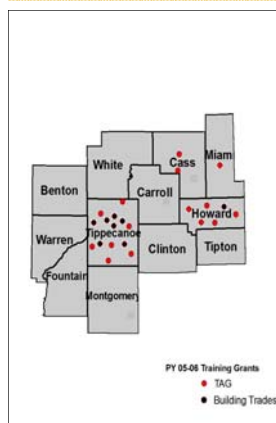

In March 2006, Governor Mitch Daniels announced that the Toyota Camry will be built at Subaru of Indiana Automotive, Inc. (SIA), creating about 1000 new jobs. Camry production at SIA will begin in spring 2007.

As a result of this collaborative effort, approximately 230 million dollars will be invested into the Lafayette area automotive plant to install Camry manufacturing processes and equipment capable of producing about 100,000 vehicles annually.

An \$ 8,000 Training Acceleration Grant was recently awarded to SIA, with the core objectives of increasing personal income and fostering job retention and growth.

ECONOMIC GROWTH REGION 5

BOONE, HAMILTON, HANCOCK, HENDRICKS, JOHNSON, MADISON, MARION, MORGAN, SHELBY

Regional Overview

EGR 5 consists of nine counties that are centrally located in the state. This area has experienced the state's largest job growth with almost 12,000 more jobs over the last year. The largest growth has been in construction; trade, transportation and utilities; professional and business services; education and health services; and leisure and hospitality industries. The average annual wage for central Indiana was \$40,546.

A primary objective for the next year is to focus on the counties surrounding Marion County, specifically Boone, Hendricks and Morgan Counties. A disproportionate amount of training funds are going to Marion County.

In accordance with IDWD's continued focus on small businesses, the number of grants awarded to businesses with 100 or less employees increased substantially from 21.6 percent in PY 04 to 50 percent in PY 05. With ninety-six percent of the employers in the region having 100 or less employees, these results will help contribute to a better skilled workforce for all employers within central Indiana.

Success Story - n|Frame, Inc. – Carmel, Indiana

n|Frame, a small business in Carmel, helps companies achieve true business continuity through a unique failover model that integrates backup systems with standard operating procedures. n|Frame's goal is to attract and retain one of Indiana's most talented technology teams. IDWD's matching education grant of \$143,805 was a valued catalyst toward this critical mission. n|Frame utilized the state's contribution to provide 23 engineers and professionals with additional technical training, continuing education, and certifications in network infrastructure and network security. In addition to building and retaining a stellar engineering team, n|Frame has also benefited from the training grant through increased sales, improved reputation, customer retention and cost savings by keeping more work in-house and in-state.

"Our engineers are second to none in the state, and continuing education is a vital component in our employee's professional development. We are committed to providing our staff with the latest training and certifications available," said Robert J. Alcorn, n|Frame's chief operating officer. "With the state's support, we have solidified our competitive edge by attracting and investing in some of the best technology minds in Indiana." n|Frame found the state's application process to be easy and understandable. n|Frame was notified within 15 days that its request for a matching grant was approved.

Allied Health Skill Shortage

EGR 5 will utilize part of its Strategic Skills Initiative grant to develop a scholarship program for the allied health fields. The allied health fields include ultrasound technologists, radiological technicians, surgical technicians, and respiratory therapists. The region projects that 99 students will receive scholarships and that 89 will be placed in both emerging and shortage occupations in the allied health fields.

ECONOMIC GROWTH REGION 6

BLACKFORD, DELAWARE, FAYETTE, HENRY, JAY, RANDOLPH, RUSH, UNION, WAYNE

Regional Overview

Economic Growth Region 6 is comprised of the nine counties located in the east central portion of the state.

Almost 7,000 private employers call region 6 their home employing approximately 105,000 workers. Average annual wage for private employment is \$30,765. The area was especially hard hit by the 2001 recession and is slowly rebounding. Since last year, latest employment statistics show a net gain of 1,690 jobs in the region.

Training Acceleration Grants (TAG) funds are heavily concentrated in Delaware County. Although this is expected since Delaware County has a large urban area centered around Muncie and Ball State University, one of the goals for next year is to reach the more rural areas in the region, specifically Blackford, Jay, Randolph, Rush, and Union Counties.

Another goal for the coming year will be to align TAG initiatives with the region's Strategic Skills Initiatives, which are to strengthen the Agri-business and Agri-science industries in the area. Support through training will prepare workers to meet the growing demand of the Agri-business and Agri-science industries identified through SSI.

Strategic efforts to target small businesses in the region have resulted in 62.5 percent of the TAG training funds going to businesses with a 100 or less employees. Considering no grants went to small businesses the previous year, these results are phenomenal.

Rutter Communications Network

Rutter Communications Network based in Muncie, is an excellent example of TAG funds helping a company develop its workers' skills. This small employer is a marketing communications firm specializing in cable television advertising sales, video production services, Internet and web marketing.

The \$5,795 grant will train videographers and editors on Adobe After Effects software. The software allows video professionals to create motion graphics and 3D animation. It can be used in film post-production and in the creation of television commercials, which require digital effects to be integrated with live video or film.

"Our editors are very talented, but the software and technology change so rapidly in our industry that we sometimes have difficulty catching up," said Adlai Chester, VP of Finance. "The grant allowed us to bring our staff in from two different markets (Indianapolis and Muncie), provide the training on this software and immediately use it in our work. One of the editors just won a regional Emmy."

Agri-Business Venture

Strengthening its vibrant Agri-business and Agri-science industries is a key component of EGR 6's Strategic Skills Initiative (SSI). Its SSI grant will assist in the formation of business plans, technology assessments, feasibility studies, and assist with venture creation in the Agri-business and Agri-science industries. The long-term objective is to create new business in the region.

ECONOMIC GROWTH REGION 7

CLAY, PARKE, PUTNAM, SULLIVAN, VERMILION, VIGO

Regional Overview

Indiana Economic Growth Region 7 shares its entire western border with Illinois and is comprised of the six counties located in the west central area of the state.

The Training Acceleration Grants (TAG) were heavily concentrated around Terre Haute, the only urban area in the region. Efforts during the next year will focus on reaching out to the underserved counties of the region, Vermillion, Sullivan, and Parke.

Since 97 percent of the employers in the region have 100 or less employees, aggressive measures are in place to increase the participation rate of small firms in the area. Since last year, approximately 23 percent more training grants went to small firms.

Seventy-one percent of the training funds went to various sectors in the manufacturing industry. The objective is to continue to focus on the manufacturing industry while also reaching out to other industries that have potential for growth. These include healthcare, logistics, and information technology.

D&D Automation

D&D Automation is a small machine shop in Terre Haute that manufactures tooling for automotive electronics. Most of its customers are in the aerospace and automotive industries, which require it to keep up to date on advanced technology. Though valued in the community and doing work for businesses in the area, there is still a lot of business going to surrounding states. To help alleviate this problem, D & D Automation is in the process of expanding and recently spent more than \$20,000 on software to become more competitive and to gain additional customers. In order to use this advanced software to its fullest capacity, D&D applied for a Training Acceleration Grant and received \$29,964 to train its employees. The training is for SolidWorks, GibbsCam, AllenBradley, and Career Development Certificates.

Though D&D has about a year left on its grant, the training on the new software has already helped the company. David Decker, Operations Manager, stated training put them "on a new plane in industry." D&D has more capabilities and is attracting business it could not be obtained in the past. It is bringing more business back to Indiana and is booked out to 2009.

Maintenance Shortages

Through the Strategic Skills Initiative, EGR 7 identified occupations in maintenance repair and machinery maintenance as having critical shortages. In an effort to address these shortages, the region is implementing an Industrial Maintenance Technician program with Ivy Tech Community College. The training will be provided to underemployed and dislocated workers. Training will give these workers the opportunity to secure high-wage sustainable employment in a skilled trade.

ECONOMIC GROWTH REGION 8

BROWN, DAVIESS, GREENE, LAWRENCE, MARTIN, MONROE, ORANGE, OWEN

Regional Overview

Economic Growth Region 8 consists of eight counties located just southwest of central Indiana. Located within this region is Indiana University, one the state's largest public universities. In 2005, almost 6,000 private employers called region 8 home, employing approximately 85,000 workers with average annual wage of \$28,652.

According to the latest employment statistics, the region realized a gain of 1,880 jobs over the last year. Manufacturing; professional and business services; and education and health services were the primary sectors contributing to the region's growth.

The region was awarded \$1,550,824 in TAG funds in PY 05. Interestingly, ninety-seven percent of the employers in the region have 100 or less employees.

Objectives for the next year include:

- Intensify efforts to increase small business participation
- Continue outreach to underserved communities, particularly Owen, Greene and Martin Counties
- Collaborate with the Indiana Biomanufacturing and Training Institute to support the Strategic Skills Initiative

Daviess County Economic Development Corporation

The Daviess County Economic Development Corporation (DCEDC) has diligently worked with employers in the county for the past four years to provide customized technical and workplace skills training to their workforce. DCEDC received \$194,540 in TAG funds on behalf of Purdue Farms and Olon Industries. Purdue Farms is a poultry processing facility, and Olon Industries manufactures furniture components. Both organizations are utilizing the TAG funds to train employees in the top levels of a four-tier community career path, which has been customized to meet manufacturing needs. At the completion of the training, all of the trainees will have accumulated a minimum of 37 college credits. One of the key objectives of the training program is to have students study and map out their organization's manufacturing process. While utilizing this process, the employees at Purdue Farms discovered an unused piece of mixing equipment that drastically changed their manufacturing process. To date, they have saved an estimated \$240,000.

New Bio Manufacturing and Training Institute

A portion of the region's Strategic Skills Initiative (SSI) grant will be used to create the Indiana Biomanufacturing and Training Institute. The institute will support the growth of biotechnology and biomanufacturing jobs in Economic Growth Region 8. Training will be provided to workers in the region's life science firms to upgrade their skills.

ECONOMIC GROWTH REGION 9

**BARTHOLOMEW, DEARBORN, DECATUR, FRANKLIN, JACKSON,
JEFFERSON, JENNINGS, OHIO, RIPLEY, SWITZERLAND**

Regional Overview

Economic Growth Region 9 is comprised of the 10 counties located in the southeastern portion of the state. The region is bordered by Kentucky to the south and Ohio to the east.

The region has seen marginal job growth over the last year with the addition of about 300 jobs. The annual average wage for private employers is \$34,278. Healthcare is the leading employment sector within the region.

EGR 9 was awarded \$830,620 in TAG funds and all went to employers in a variety of manufacturing industries, primarily automotive. Almost 97 percent of the region's employers had 100 or less employees, and 27 percent of TAG funds went to these employers.

Objectives next year include:

- Stronger emphasis on reaching small businesses
- A more diversified industry focus for training grant awards
- An increased participation among employers within the healthcare industry

Grote Industries

Grote Industries is a manufacturer and marketer of vehicle safety system products, that include lamps, mirrors, wiring systems, turn signal switches, and reflective accessories. Grote Industries was awarded \$42,356 in TAG funds to train 15 employees in Microsoft Office. Although the grant does not end until August 2007, a number of Grote employees have already earned Microsoft Office Specialist (MOS) Certifications in Word and Excel.

"Based on pre - and- post training assessments," Tom Blades, Plant Manager, said, "all participants enhanced their skill sets and the training has improved morale, departmental operations, and productivity."

Engineering and Computerized Control Industry Growth

EGR 9 has a strong supply-chain relationship to the automotive and emission industries. A number of companies within the region have developed employment opportunities around the dual disciplines of engineering and computerized controls and software, commonly called "embedded systems". Currently, there is an urgent regional need for skilled workers within this emerging cluster.

Embedded systems is a special purpose computer controlled electro-mechanical system in which the computer is completely protected by the device it controls, and it performs pre-defined tasks. Examples of the embedded systems devices include iPods, ATM's, cell phones, emission controls, and engine controllers.

Through the Strategic Skills Initiative grant, EGR 9 will implement five programs in an embedded systems cluster to provide new training and advancement opportunities.

ECONOMIC GROWTH REGION 10

CLARK, CRAWFORD, FLOYD, HARRISON, SCOTT, WASHINGTON

Regional Overview

Economic Growth Region 10 is comprised of six counties located in the southeast pocket of the state, and it shares a border with Kentucky. In 2005, almost 5,700 private employers called this area home. The average annual wage is \$34,278. Approximately 900 jobs were added to the region with the majority of those jobs in trade transportation and utilities, financial activities, healthcare and professional business services.

Training grant activities were divided between manufacturing, agri-business and healthcare sectors.

Objectives for next year include:

- A continuous focus on reaching all industrial sectors
- Aggressively reaching out to small employers with an employee size of 100 or less

General Mills, Inc.

General Mills, Inc. is one of the nation's largest producers of cereal, baking products and snacks. Located in southeaster Indiana, the company manufacturers dough and flour mixes. In 2005, General Mills utilized its Training Acceleration Grant to enhance the skills of its maintenance personnel. "The training provided has helped us overcome numerous challenges posed by new technologies and has also helped improve equipment reliability and plant performance," said Training Manager, Matt Wright. Additionally, the organization utilized TAG funds to provide technical training for two apprenticeship program, ensuring that new mechanics and electricians are capable of contributing to the continuous success of the organization.

Healthcare Shortage

Through the Strategic Skills Initiative, EGR 10 will implement three solutions addressing the projected shortage of healthcare workers. The region will support incumbent and emerging workers who are pursuing degrees in medical/clinical laboratory technician and respiratory therapist occupations.

The region is also implementing a registered nurse mentoring program in area hospitals to increase retention rates and overall performance. In addition the region is supporting entry-level healthcare-worker training to increase the pipeline for healthcare workers in the region and fill skill shortages.

ECONOMIC GROWTH REGION 11

**DUBOIS, GIBSON, KNOX, PERRY, PIKE, POSEY, SPENCER,
VANDERBURGH, WARRICK**

Regional Overview

The area designated by the Indiana Department of Workforce Development as Economic Growth Region 11 is located in the southwest corner of the state. The nine county region is bordered by Illinois to the west and Kentucky to the south. The region reported an estimated increase of 2,200 more jobs than 2005. The leading employment sectors are education and health services. The average annual wage for private employment is \$35,027.

Ninety-seven percent of employers have 100 or less employees, which is further evidence of the importance of small businesses to the region's economic growth. Last year, IDWD instituted measures that target training funds to these small businesses. As a result, 19 percent more small businesses received TAG funds to assist them with the development of their employees' skills. The goal next year is to award 40 percent of the training funds to small firms.

TAG training funds are concentrated mainly in Vanderburgh County. However, 100% of the TAG funds went to train workers exclusively in the manufacturing sector. In the coming year, the regional focus is to target other industrial sectors in addition to manufacturing.

Spectrum Container

Spectrum Container, designer and manufacturer of corrugated packaging, has been doing business in Evansville since 1998. With its \$197,980 TAG award to provide lean manufacturing training, it is anticipated the company will be more successful and build a foundation for job expansion in the next five years. Although the training will not be finished until May 2008, Spectrum Container is already seeing positive results. More efficient methods to track inventory are being implemented.

"During my visits to some of the team meetings I have seen much employee involvement in the decision making process," said Gene Meyer, president of Spectrum Container. "I am excited by the prospect of the employees taking ownership in their workplace environment."

Industrial Maintenance Shortage

Through the Strategic Skills Initiative grant, EGR 11 will implement an Industrial Maintenance Training Program to address the region's occupational shortages of maintenance and repair workers, industrial machinery mechanics, and machinery maintenance workers. The ground-breaking program for the region includes online training, increased awareness of industrial occupations through promotion of training opportunities.

TAG Awards by County

County	Grants 2005	Funds Awarded 2005	Funds Awarded 2004
Dubois	2	\$188,443	\$281,461

GLOSSARY OF TERMS

Active Grants

Grants with businesses that are still working toward their outcomes during the current program year, Program Year 2005.

Adult Employment and Credential Rate (WIA Performance Measurement)

Of adults who received training services: Number of adults who were employed in the first quarter after exit and received a credential by the end of the third quarter after exit divided by the number of adults who exited services during the quarter. To calculate this rate, the time period used was October 2004 through September 2005.

Adult Entered Employment Rate (WIA Performance Measurement)

Of those who are not employed at registration: Number of adults who have entered employment by the end of the first quarter after exit divided by the number of adults who exit during the quarter. To calculate this rate, the time period used was October 2004 through September 2005.

Adult Retention Rate At Six Months (WIA Performance Measurement)

Of those who are employed in the first quarter after exit: Number of adults who are employed in the third quarter after exit divided by the number of adults who exit during the quarter. To calculate this rate, the time period used was April 2004 through March 2005.

Adult Six Month Earning Increase (WIA Performance Measurement)

Of those who are employed in the first, second and third quarter after exit: Total post-program earnings (earnings in quarter 2 + quarter 3 after exit) divided by the number of adults who exit during the quarter. To calculate this rate, the time period used was April 2004 through March 2005.

Advance Indiana (ADVI)

Training grant program created in 2003 in response to Energize Indiana, the state's long-term economic development plan, to focus on four targeted high-skill industry clusters: advanced manufacturing, life sciences, information technology, high-tech distribution. The program was funded with special federal dollars. The program ended in 2005.

Building Trades Program

A training program which provides an exceptionally comprehensive craft-related instruction program and general education courses in construction trades. The program blends traditional apprenticeships with a college-level curriculum. Workers who successfully complete the program can achieve journey worker status in their particular trade as well as an Associate degree.

Closed-out Grants

Grants that were closed out during the previous program years.

Dislocated Worker Employment & Credential Rate (WIA Performance Measure)

Of dislocated workers who received training services: Number of dislocated workers who were employed in the first quarter after exit and received a credential by the end of the third quarter after exit divided by the number of dislocated workers who exited services during the quarter. To calculate this rate, the time period used was October 2004 through September 2005.

Dislocated Worker Entered Employment Rate (WIA Performance Measure)

Of those who are not employed at a participation: Number of dislocated workers who have entered employment by the end of the first quarter after exit divided by the number of dislocated workers who exit during the quarter. To calculate this rate, the time period used was October 2004 through September 2005.

GLOSSARY OF TERMS

Dislocated Worker Retention Rate at Six Months (WIA Performance Measure)

Of those who are employed in the first quarter after exit: Number of dislocated workers who are employed in the third quarter after exit divided by the number of dislocated workers who exit during the quarter. To calculate this rate, the time period used was April 2004 through March 2005.

Dislocated Worker Six Month Earning Increase (WIA Performance Measure)

Of those who are employed in the second and third quarter after exit: Total post-program earnings (earning in quarter 2 + quarter 3 after exit) divided by the number of dislocated workers who exit during the quarter. To calculate this rate, the time period used was April 2004 through March 2005.

Earnings Replacement Rate (ERR)

One of two measurements used to gauge long-term benefits of the Department of Workforce Development's incumbent worker training programs. The ERR measures wage gain by comparing quarterly wages earned in the entrance quarter to wages earned one year after training has ended. The ERR is determined by dividing quarterly wages earned in the fourth quarter after training is completed by the average quarterly wages earned in the entrance quarter. An ERR above 100% indicates a wage gain. Workforce Investment Act (WIA) wage gains are listed separately.

Gain Education and Training (GET)

Training made possible through legislation that allowed IDWD to use up to \$6.5 million from the Penalties and Interest Fund. Targeted to raising the skill level of incumbent workers These funds were made available on July 1, 1999, and reached its sunset on June 30, 2004.

Incumbent Worker Training (IWT)

Training grants to employers that result in career paths, wage gains, and portable, recognizable credentials. Incumbent worker training funds established in 2001 funded the program. Legislation required that 55% of the funds be earmarked to Ivy Tech State College and the remaining 45% for other incumbent worker training programs. Revised legislation in 2005 paved the way for the Training Acceleration Grant. The Incumbent Worker Training program ended June 30, 2005.

Indiana Plan

An organization that provides pre-apprenticeship training to woman, minorities, and disadvantaged workers in basic construction related skills, and classroom training. Training includes: applied construction mathematics, spatial relations, and mechanical reasoning.

Older Youth Credential Rate (19-21) - (WIA Performance Measurement) The number of older youth who are in employment, postsecondary education, or advanced training in the first quarter after exit and received a credential by the end of the third quarter after exit divided by the number of older youth who exit during the quarter. To calculate this rate, the time period used was October 2004 through September 2005.

Older Youth Entered Employment Rate (19-21) (WIA Performance Measurement)

Of those who are not employed at registration and who are not enrolled in postsecondary education or advanced training in the first quarter after exit: Number of older youth who have entered employment by the end of the first quarter after exit divided by the number of older youth who exit during the quarter. To calculate this rate, the time period used was October 2004 through September 2005.

Older Youth Retention Rate at Six Months (19-21) (WIA Performance Measurement)

Of those who are employed in the first quarter after exit and who are either not enrolled in postsecondary education or advanced training in the third quarter after exit or are employed in the third quarter after the exit quarter: Number of older youth who are employed in the third quarter after exit divided by the number of older youth who exit during the quarter. To calculate this rate, the time period used was April 2004 through March 2005.

GLOSSARY OF TERMS

Older Youth Six Month Earning Increase (19-21) (WIA Performance Measure)

Of those who are employed in the first quarter after exit and who are either not enrolled in post-secondary education or advanced training in the third quarter after the exit quarter or are employed in the third quarter after the exit quarter: Total post-program earnings (earnings in quarter 2 + quarter 3 after exit) minus total pre-program earnings (earnings in quarter 2 + quarter 3 before participation) divided by number of older youth who exit during the quarter. To calculate this rate, the time period used was April 2004 through March 2005.

Program Year

The time period starting July 1 and ending June 30.

PY 05

The time period starting July 1, 2005 and ending June 30, 2006

Regional Skill Alliance (RSA)

Training grants targeted to support regional initiatives. Grants were primarily to a grant administrator on behalf of several companies that had similar training needs. The program was funded with special federal dollars and ended with one grant award in PY 04. The regional approach to training was absorbed into the TAG program.

Retention Rates

One of the measurements used to gauge long-term benefits of DWD training programs. Retention rates are calculated using wages reported one year after the completion of training. Workforce Investment Act (WIA) retention rates are listed separately.

Reporting Period

All Department of Workforce Development training activities that occur between July 1, 2005 and June 30, 2006 (PY05).

Training Acceleration Grant (TAG)

An innovative incumbent worker training program created to increase the skills of Indiana's workforce. Training must result in a portable, recognizable certification.

Trade Adjustment Assistance (TAA) – A federal reemployment program established by the Trade Act of 1974 to assist workers who have jobs that are impacted by increased imports from, or shift in production to, foreign countries.

Unemployment Insurance Wage Database – The repository for all wage data from the Unemployment Insurance's quarterly tax reports submitted by employers.

WIA Performance Measure Results – See specific listing for explanation of measure

- Adult Employment & Credential Rate
- Adult Entered Employment Rate
- Adult Retention Rate
- Adult Six Months Earnings Change

- Dislocated Worker Employment & Credential Rate

- Dislocated Worker Six Month Earnings Increase

GLOSSARY OF TERMS

Dislocated Worker Employment & Credential Rate
Dislocated Worker Entered Employment Rate
Dislocated Worker Retention Rate
Dislocated Worker Six Month Earnings Increase

Youth (14-21) Placement in Employment or Education
Youth (14-21) Attainment of a Degree or Certificate

Older Youth (19-21) Credential Rate
Older Youth (19-21) Entered Employment Rate
Older Youth (19-21) Retention Rate
Older Youth (19-21) Six Months Earnings Increase

Younger Youth Diploma Attainment Rate for (14-18)
Younger Youth (14-18) Retention Rate
Younger Youth (14-18) Skill Attainment Rate

Workforce Investment Act – Federal legislation designating regional workforce service areas based on population, workforce commuting patterns, economic development, and other demographic considerations to provide core, intensive, and training services based on local needs. The goal of the Workforce Investment System is to increase the employment, retention, and earnings of participants, and increase occupational skill attainment by participants, and, as a result improve the quality of the workforce, reduce welfare dependency, and enhance the productivity and competitiveness of the nation.

Younger Youth Diploma Attainment Rate (14-18) (WIA Performance Measurement)

Of the younger youth who register without a diploma or equivalent: The number of younger youth who attained a secondary school diploma or equivalent by the end of the first quarter after exit divided by the number of younger youth who exit during the quarter (except those still in secondary school at exit). To calculate this rate, the time period used was April 2004 through March 2005.

Youth (14-21) Attainment of a Degree or Certificate (WIA Performance Measure)

Of all youth enrolled in education (at the date of participation or at any point during the program): Number of youth who attain a diploma, GED, or certificate by the end of the third quarter after the exit quarter divided by the number of youth who exit during the quarter. To calculate this rate, the time period used was October 2004 through September 2005.

Youth (14-21) Literacy and Numeracy Gains (WIA Performance Measurement)

Of those out-of-school youth who are basic skills deficient: Total number of out-of-school youth who increase one or more educational functioning levels divided by total of out-of-school youth who have completed a year in the youth program (i.e., one year from the date of first youth program service) plus the number of out-of-school youth who exit before completing a year in the youth program. Indiana did not collect data for this measure for PY05.

Youth (14-21) Placement in Employment or Education (WIA Performance Measure)

Of all youth who are not in post-secondary education or employment (including the military) at the date of participation: Total number of youth who are in employment (including the military) or enrolled in post-secondary education and/or advanced training/occupational skills training in the first quarter after exit divided by the number of youth who exit during the quarter. To calculate this rate, the time period used was October 2004 through September 2006.

APPENDIX B

INCUMBENT WORKER TRAINING RETENTION RATES & ERR

Retention rates and earning replacement rates (ERR) are measurements that are used to help gauge the long-term benefits of training. Retention rates and ERR are calculated using total quarterly earnings that employers have submitted to IDWD. Wages may be from more than one employer and include overtime. Wages earned in another state will lower the retention rate because those wages are not submitted to IDWD.

ERR and retention rates are not calculated until one year after a project has ended. This allows the department time to compare the wages earned upon enrollment in training to wages earned one year after training is finished.

The retention rate is determined by dividing the number of trainees with wages one year after training is over by the number enrolled in training. The retention rate for PY 04 (July 1, 2004 to June 30, 2005) was 90%, slightly less than the previous year. This means that 90% of the trainees were still employed in Indiana one year after their training

The ERR is a measurement of wage gain. It is calculated by dividing the average quarterly wage for the fourth quarter after training by the average quarterly wage when enrolled in training. An ERR above 100% indicates a wage gain. The ERR for PY 04 was 107%, slightly higher than the previous year's ERR of 105%.

The table below illustrates the ERR and retention rates starting with PY 99 and ending with PY 04. Retention rates and ERR are listed on the following pages for each project that ended during PY 04. Definitions for each specific program referenced are in the glossary starting on page 24.

Program Year Comparison	ERR	Retention Rate
PY 04	107%	90%
PY 03	105%	91%
PY 02	107%	95%
PY 01	103%	91%
PY 00	111%	94%
PY 99	112%	92%
